NHTSA-03-14375-44

Docket Management,

I am writing to let you know that I concur with the comments of the Motorcycle Riders Foundation with regards to Docket NHTSA 2003-14375. In short, the MRF feels that this proposed study would be a senseless and meaningless waste of taxpayer dollars, and disputes the "practical utility" of this proposal in its public comments. In part, the MRF emphasizes "our unshakable commitment to PREVENTING the crash in the first place, and we continue to appeal to [NHTSA] for a meaningful partnership and effective programs that lead to crash prevention... [particularly] support for a resource injection to help motorcycle safety [training]."

I respectfully request that you take the time to consider the MRF's comments and that you note the motorcycling community's support of the MRF's position.

Respectfully,

Penny S. Adams
